

Maintenance

Replace the switch

Open the glass panel by touching the lighting button, then cut off the power and remove the fixed screws of panel. Next, take off the panel and remove the fixed screws of control box, which can replace the switch.

Bulb/Tube Changing:

You must pull off the electric plug before changing the bulb or tube. Keep the power rate of lamp no more than 1.5W and you could check the power rate from label.

Cleaning:

Do not use cleaning agents containing soda, acids, chlorides or solvents; Do not use abrasive cleaning agents, e.g. Power cleaners or cream cleaners and abrasive sponges, as well as pot scourers or sponges which have been used previously with abrasive cleaning agents. Wear gloves when cleaning surfaces to prevent your hands being hurt by seamed edges.

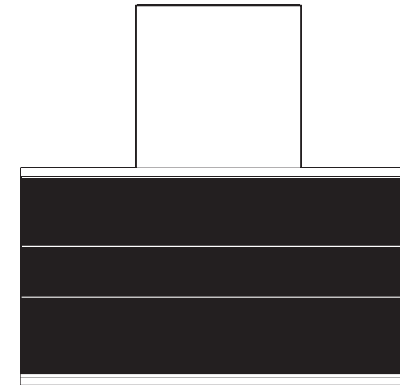

Malfunctions and solutions

Fault	Cause	Solution
Press any buttons but no responses	The plug is not or improperly inserted or no power supply	Plug the power cord
The lamp doesn't work.	The lamp is damaged, poorly contacted with the power supply.	Replace the lamp with correct rating or plug in the power cord again.
A slight electric shock on the surface of cooker hood.	The electric outlet is not effectively grounded.	Use one-way triple socket and have a good grounding
Irregular sounds when the impeller operates.	The impeller becomes loose and screws are not fixed.	Tighten up the screw of impeller
Oil dripping	Installation of oil collector is not suitable.	Install correctly.

Installation method

Installation of Hood

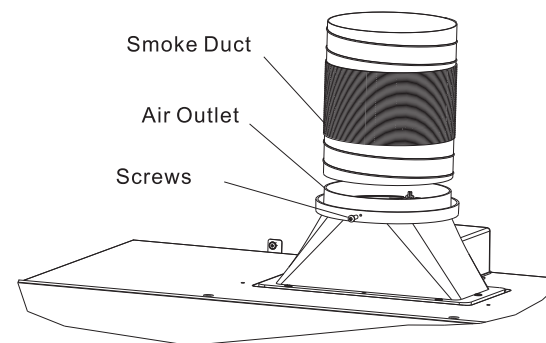

Find out the positioning(as above), then fix cooker hood on the wall by screws.

Install the hang strip first.

Install the smoke duct as above.

- Notice:
1. Make sure the smoke duct is bending less than 90 degree;
 2. Don't connect with other duct hose diameter is less than 178mm.

Installation of Smoke Duct

- a). Put the end of smoke duct (with ▼ mark) into the groove of air outlet, fix it with screws, then throw toward outside or public exhaust channel.
- b). If the smoke duct is too long, please keep it in roll and fix it to avoid shaking while hood is working.
